

Talk

Build a Culture of Belonging by Communicating, Connecting and Giving Your People a Voice

UKG Talk helps solve the challenging business problem of connecting and collaborating with increasingly remote teams and a frontline workforce. As many organisations shift to a long-term hybrid workforce model, the importance of collaboration tools and employee communications is paramount. Talk is a mobile-first solution that seamlessly fits into the flow of work, helping organisations reach all their employees, boost productivity, and create a more inclusive sense of community.

Connect and Communicate with Frontline Workers

Source of truth for timely employee communications that fit seamlessly in the flow of work.

Create an Environment Where People Feel Valued

Inspire people to do their best work by creating an inclusive environment and giving them a voice.

Understand Communication Insights and Trends

Recognise if your communications are engaging and resonating with your people and teams.

Key benefits

Build a culture of belonging

Messaging

- Provide timely communications to all employees or specific individuals and groups.
- Streamline intra- and inter-departmental communications via 1:1 and group chats.
- Easily find teammates in the employee directory to start a new chat or just chat within an existing thread.

Groups

- Foster peer-to-peer and team collaboration, public recognition, and a sense of community.
- Support a vibrant and inclusive culture by giving employees a space to engage in discussions about their hobbies and interests.
- Membership in groups and social actions can be configured and managed.

Engagement

- Recognise your people at key moments or after key achievements with our employee recognition app.
- Listen and gather feedback and opinions from your people through pulse check surveys.
- Create challenges that ask your employees for their best ideas on a particular topic or issue with our Ideabox app.

Insights

- As a communications manager, measure communication impact and effectiveness in real time.
- Understand user behaviour like activity by hours of the day or week to best post critical updates.
- Measure key metrics like user engagement, trending content, or top contributors to set communication strategies.
