# Attestation

Flexible tools to help your people **keep up with regulatory requirements**.

UKG Ready® Attestation works seamlessly with UKG Ready Time and your data collection source to capture accurate employee attestation responses in real time and deliver automatic actions based on configurable workflows. It also enables managers to monitor employee attestation status, run reports to identify trends, and simplify ongoing compliance.

Simplified compliance

Streamline your compliance efforts by leveraging our automated notifications and reminders to ensure that employees receive attestation prompts before or after their shift. If any attestations are missed, both managers and employees can be automatically alerted.

Flexible configuration

Ensure your organisation can adapt to ever-changing attestation regulations and improve your enforcement of wage and hour policies through flexible workflows and customisable prompts that capture attestation data for meal and rest breaks, employee health statuses, and more.

Real-time analytics

Gain real-time visibility into attestation data so you are able to proactively identify trends and manage exceptions before they become pervasive problems. Also enable managers to monitor employee attestation statuses and manage exceptions through simple reports and analytics.

Key benefits

For HR professionals

Streamline your attestation process by automating the collection of required data

Support compliance and mitigate risk with flexible configurations to comply with the latest regulation changes

Gain real-time visibility into attestation trends and data to proactively manage exceptions

Reduce the administrative burden of auditing attestation data with automated reports

Ensure consistent adherence to labour laws, collective bargaining agreements, and organisation-specific policies

For employees and managers

Easily complete attestations within the flow of work and on any device

Quickly identify trends and manage exceptions

Eliminate the administrative burden of paperwork and manual processes for tracking attestations
